Ambrell to Exhibit at FABTECH 2019 in Chicago, IL USA
At booth A3334 attendees can see induction heating demonstrations and discuss their applications with Dr. Dahake from THE LAB

Rochester, NY — Ambrell, an inTEST Company and a leading manufacturer of induction heating systems, will exhibit at FABTECH 2019. The event will take place November 11-14 at McCormick Place in Chicago, IL USA and Ambrell representatives will be present in booth A3334. At the booth, induction demonstrations will be offered, and application engineers will be on-hand to discuss attendee heating applications.

Induction heating is a rapid, efficient, controllable, non-contact method of heating electrically conductive materials. Non-conductive materials can also be heated with a conductive susceptor. Systems often require less of a footprint than other heating methods; especially when one considers that the coil and workhead can be placed a considerable distance away from the induction power supply.

Ambrell manufactures a wide range of high and low frequency induction heating systems, ranging from 1 kW to 500 kW. All systems are manufactured at its Rochester, NY USA headquarters with global sales and service locations. The cornerstone of the Ambrell experience is its applications testing. THE LAB at Ambrell will test the client's application and recommend the right system based on their process requirements.

FABTECH draws over 48,000 professionals from across the United States to learn about the latest advancements in manufacturing. Over 1,700 companies exhibit in areas such as metal forming, fabricating, welding, and finishing. Dr. Girish Dahake, who is an induction heating guru with over 25 years of experience, will be available at booth A3334 to discuss heating applications. Visitors are encouraged to bring parts and drawings.

More information is available on www.fabtechexpo.com or at www.ambrell.com. Use code FBGuest when you register to receive a free exhibit hall pass.

About Ambrell

Founded in 1986, Ambrell Corporation, an inTEST Company, is a global leader in the induction heating market and is renowned for its application and engineering expertise. Exceptional product quality and outstanding service and support are at the core of the company's commitment to provide the best customer experience in the industry. Ambrell is headquartered in the United States with operations in the United Kingdom and the Netherlands. All products are engineered and made at the company's manufacturing facility

in the United States, which is ISO 9001:2015-certified. Over the last three decades Ambrell has expanded its global reach through an extensive OEM and distribution network and today has more than 15,000 systems installed in over 50 countries.
