Ambrell to Exhibit at HOUSTEX 2019 in Houston, TX USA
Attendees can check-out an induction heating demonstration and speak to Dr. Dahake from THE LAB

Rochester, NY — Ambrell, an inTEST Company and a leading manufacturer of induction heating solutions, will exhibit at HOUSTEX once again. The show will take place February 26-28 at the George R. Brown Convention Center in Houston, TX USA and representatives will be on-hand in booth 1442.

At the booth, induction heating solutions will be on display, including a working EASYHEAT™ induction heating system. Ambrell manufactures a wide range of high and low frequency induction heating systems, ranging from 1 kW to 500 kW. Systems are manufactured at their new headquarters and manufacturing facility in Rochester, NY USA and there are sales and service locations around the globe.

Induction heating offers several benefits to manufacturers including speed, precision and repeatability which can result in faster throughput and a more consistent, higher quality product. Induction can be used for a wide array of applications including brazing, soldering, annealing, metal-to-plastic insertion, heat treating, carbide heating, material testing, shrink fitting and more in industries such as automotive, aerospace, oil/gas, medical manufacturing, and research.

The cornerstone of the Ambrell experience is applications testing from THE LAB. There, experienced engineers test client applications and recommend the right systems based on their process requirements. Dr. Girish Dahake from THE LAB will be at the booth to discuss attendee heating applications. Attendees are encouraged to bring their parts and drawings to the booth.

HOUSTEX draws over 4,600 professionals from the region to learn about the latest advancements in manufacturing. More information is available on the HOUSTEX website or at www.ambrell.com. Use code 10003238 upon registration to receive a free exhibition pass.

About Ambrell

Founded in 1986, Ambrell Corporation, an inTEST Company, is a global leader in the induction heating market and is renowned for its application and engineering expertise. Exceptional product quality and outstanding service and support are at the core of the company's commitment to provide the best customer experience in the industry. Ambrell is

headquartered in the United States with operations in the United Kingdom and the Netherlands. All products are engineered and made at the company's manufacturing facility in the United States, which is ISO 9001:2015-certified. Over the last three decades Ambrell has expanded its global reach through an extensive OEM and distribution network and today has more than 15,000 systems installed in over 50 countries.
